HOW TO USE THE CUT-A-CIRCLE

The Cut-a-Circle is a simple device, but there are a few points which can assist you and prevent you from spoiling badges.

(1) Always use the Cut-a-Circle on a hard surface such as the laminex board supplied with your machine. Alternatively, a cheap laminex coated chopping board is fine.

By using a hard surface, you will achieve a clean cut through your artwork.

(2) Centre the Cut-a-Circle frame over your artwork. Spread the fingers of one hand and place them on the "arms" of the frame. This will ensure even pressure around the circle, to hold your artwork steady. (Fig. 8)

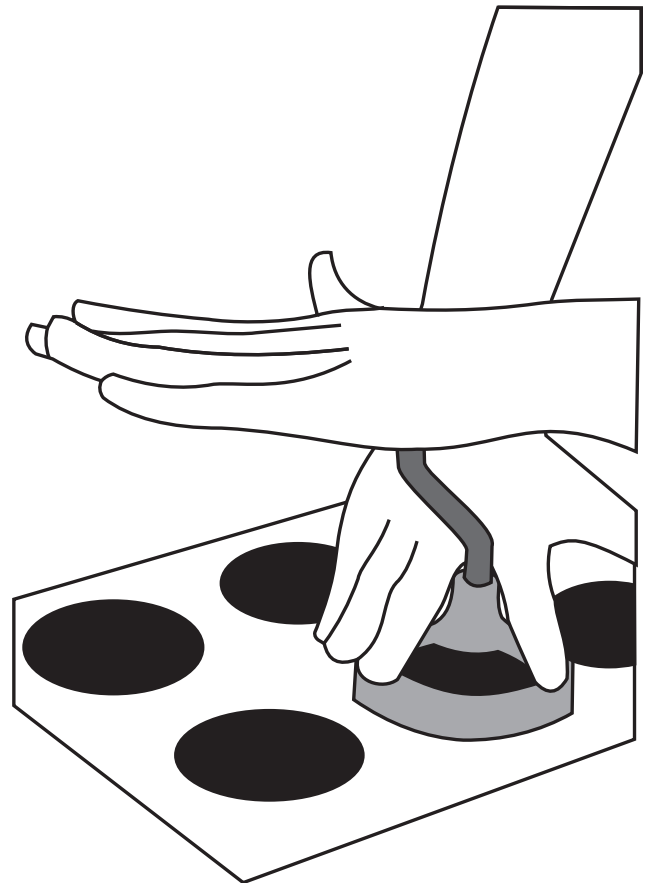

FIG. 8
"...Centre the Cut-A-Circle
over your artwork"

(3) Place the palm of your other hand on the handle knob, press down and briskly rotate the handle one complete revolution. This should be sufficient to cleanly cut your artwork.

When making large quantities we recommend you complete a badge in full before completing all the cutting.
